

Assessment of safety setting for provision of EI services for _____

Child's name _____

All EI Providers should observe the setting to ensure that safe conditions exist for each therapy session.

1. Allergy reported by parents/caregiver:

- No allergy
- Child has allergy to _____. Any child that has a food allergy shall have a plan worked out among the parent, primary care provider, EI provider and EIO, which includes identification and documentation of the allergy, prevention of exposure, and required plan to treat an allergic reaction. Please contact CPG as soon as allergy is reported by parents so we can help develop plan to treat an allergic reaction.

2. EI services provided at:

- Home

	Home environment does not pose harm to children during service delivery (e.g., peeling or chipping paint, leaking ceilings, or hanging electrical wires).
	The child is not exposed to secondhand smoke from individuals in their immediate environment.

- Licensed day care Home day care center Other community facility _____

Indoor areas

	The service delivery area is free of potential fire, construction and other types of structural hazards
	Restrooms are available accessible, clean with necessary products available
	Hallways and/or exits are not obstructed and are free from clutter
	Stairs are lighted
	Stairs, walkways, ramps are free of ice, snow and have railings
	Pets on premises do not pose a potential threat to children;
	EI service areas entrances and exits that prevent children from wandering out of the immediate areas;
	No other physical conditions that are hazardous to children (peeling paint or hanging electrical wires);
	Evacuation procedures and routes are prominently posted;
	Providers are aware of the current emergency evacuation plan and evacuation routes in the community-based setting, location of telephones on premises and up-to-date emergency telephone numbers.

3. Services are not provided outdoors.

Services provided outdoors. Assess the following: The EI provider has

	readily available, first aid kit that include disposable gloves, soap, hydrogen peroxide, tweezers, various sized bandages, nonallergic tape, sterile gauze, scissors, and thermometer;
	readily available working flashlights and Infant/Toddler Choking First Aid instructions
	readily available emergency system contact numbers for medical assistance and transportation;
	readily available, up-to-date information for contacting parents in the event of emergencies;
	readily available, up-to-date emergency consents and telephone to report emergency situations
	a plan in case of disaster and evacuation procedures;
	Site is free of obstacles that could cause injuries such as overhanging tree branches, wires, etc.
	Play equipment is clean and in good condition
	Walkways are clear of trash and clutter to prevent tripping;
	Play areas are clear of debris and small or potentially harmful objects;
	Play equipment is developmentally appropriate, securely anchored and has adequate protective surfacing under/around playground equipment to help absorb the shock if a child falls.
	No openings in equipment that can trap a child's head, such as openings in guardrails or ladders;
	Elevated surfaces such as platforms and ramps have guardrails to prevent falls
	Slides have large decks and hand rails at the top; Merry-go-rounds have solid, flat riding surfaces and handholds; Sandbox is clean and free of organic, toxic or harmful material
	Public restrooms are available, clean and are supplied with toilet paper, soap, and disposable towels
	There are no other physical conditions that are potentially hazardous to child.
